

UÇEP: Disease ↔ Symptom

332 entries · 1228 relations

Each entry: a heading row (Disease — name, level/organ or category) followed by the linked Symptoms. Markers: + disease · § course · > symptom. (...) sub-info, * highlighted.

Learning levels

A Emergency — Recognise the emergency, provide the initial treatment and refer to a specialist when necessary.

ÖnT Preliminary diagnosis — In non-emergency situations, make a preliminary diagnosis, carry out the necessary initial procedures and refer to a specialist.

T Diagnosis — Make the diagnosis and know about the treatment; carry out the necessary initial procedures and refer to a specialist.

TT Diagnosis and treatment — Make the diagnosis and treat.

İ Follow-up — Carry out long-term follow-up (monitoring) and control.

K Prevention — Apply preventive measures (whichever of primary, secondary and tertiary prevention are appropriate).
