

UÇEP: Disease ↔ Symptom

332 entries · 1228 relations

*Each entry: a heading row (Disease — name, level/organ or category) followed by the linked Symptoms. Markers: + disease · § course · > symptom. (...) sub-info, * highlighted.*

Learning levels

- A** **Emergency** — Recognise the emergency, provide the initial treatment and refer to a specialist when necessary.
- ÖnT** **Preliminary diagnosis** — In non-emergency situations, make a preliminary diagnosis, carry out the necessary initial procedures and refer to a specialist.
- T** **Diagnosis** — Make the diagnosis and know about the treatment; carry out the necessary initial procedures and refer to a specialist.
- TT** **Diagnosis and treatment** — Make the diagnosis and treat.
- İ** **Follow-up** — Carry out long-term follow-up (monitoring) and control.
- K** **Prevention** — Apply preventive measures (whichever of primary, secondary and tertiary prevention are appropriate).
